Pursuant to §103D-306, HRS, and Subchapter 9, Chapter 3-122, HAR, the Department requests sole source approval to purchase the following:

The goods, services, or construction has the following unique features, characteristics, or capabilities:

The basement (floor plenum) of the spray booth is a proprietary design as part of the integral wall exhaust system. The floor plenum is split into four (4) zones, allowing multiple users to perform concurrent multicolor painting within the booth.

REQUEST FOR SOLE SOURCE (Cont.)

How the unique features, characteristics, or capabilities are essential for the agency to accomplish its work:

The AFC spray booth allows several students to paint smaller items at the same time with different color paints. This proprietary feature offers greater flexibility in instruction of students and allows the students more opportunities to practice their painting skills.

Please see the attached letter from the UH Community Colleges acknowledging that this feature is a system-wide program requirement. The Honolulu and Kauai Community College campuses have recently replaced their automotive spray booths with the requested product.

The following other possible sources for the goods, services, or construction were investigated but do not meet our needs because:

Spray booths from Garmat and Blowtherm were examined. Both manufacturer's spray booths do not have the multiple floor plenum feature.

I certify that the information provided above is to the best of my knowledge, true, correct and that the goods, services, or construction are available through only one source.
